

# SLC6A14 Antibody (C-term) Blocking peptide

Synthetic peptide Catalog # BP12976b

### **Specification**

### SLC6A14 Antibody (C-term) Blocking peptide - Product Information

**Primary Accession** 

**Q9UN76** 

## SLC6A14 Antibody (C-term) Blocking peptide - Additional Information

**Gene ID 11254** 

#### **Other Names**

Sodium- and chloride-dependent neutral and basic amino acid transporter B(0+), Amino acid transporter ATB0+, Solute carrier family 6 member 14, SLC6A14

#### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

### **Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

### SLC6A14 Antibody (C-term) Blocking peptide - Protein Information

Name SLC6A14 (HGNC:11047)

### **Function**

Amino acid transporter that plays an important role in the absorption of amino acids in the intestinal tract. Mediates the uptake of a broad range of neutral and cationic amino acids (with the exception of proline) in a Na(+)/Cl(-)-dependent manner (PubMed:<a

href="http://www.uniprot.org/citations/10446133" target="\_blank">10446133</a>). Transports non-alpha-amino acids such as beta- alanine with low affinity, and has a higher affinity for dipolar and cationic amino acids such as leucine and lysine (PubMed:<a

href="http://www.uniprot.org/citations/18599538" target="\_blank">18599538</a>). Can also transport carnitine, butirylcarnitine and propionylcarnitine coupled to the transmembrane gradients of Na(+) and Cl(-) (PubMed:<a href="http://www.uniprot.org/citations/17855766" target="\_blank">17855766</a>).

#### **Cellular Location**

Membrane; Multi- pass membrane protein. Apical cell membrane {ECO:0000250|UniProtKB:Q9JMA9}; Multi-pass membrane protein

#### **Tissue Location**

Levels are highest in adult and fetal lung, in trachea and salivary gland. Lower levels detected in

Tel: 858.875.1900 Fax: 858.875.1999

mammary gland, stomach and pituitary gland, and very low levels in colon, uterus, prostate and testis.

## SLC6A14 Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

# SLC6A14 Antibody (C-term) Blocking peptide - Background

This gene encodes a member of the solute carrier family 6. Members of this family are sodium and chloride dependentneurotransmitter transporters. The encoded protein transports bothneutral and cationic amino acids. This protein may also function as abeta-alanine carrier. Mutations in this gene may be associated with X-linked obesity. A pseudogene of this gene is found onchromosome X.
