

FSHB/FSH Antibody (Center) Blocking peptide
Synthetic peptide
Catalog # BP13055c**Specification**

FSHB/FSH Antibody (Center) Blocking peptide - Product InformationPrimary Accession [P01225](#)**FSHB/FSH Antibody (Center) Blocking peptide - Additional Information****Gene ID** 2488**Other Names**

Follitropin subunit beta, Follicle-stimulating hormone beta subunit, FSH-B, FSH-beta, Follitropin beta chain, FSHB

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

FSHB/FSH Antibody (Center) Blocking peptide - Protein Information**Name** FSHB**Function**

Together with the alpha chain CGA constitutes follitropin, the follicle-stimulating hormone, and provides its biological specificity to the hormone heterodimer. Binds FSHR, a G protein-coupled receptor, on target cells to activate downstream signaling pathways (PubMed:24692546, PubMed:2494176). Follitropin is involved in follicle development and spermatogenesis in reproductive organs (PubMed:407105, PubMed:8220432).

Cellular Location

Secreted. Note=Efficient secretion requires dimerization with CGA

FSHB/FSH Antibody (Center) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

FSHB/FSH Antibody (Center) Blocking peptide - Background

The pituitary glycoprotein hormone family includes follicle-stimulating hormone, luteinizing hormone, chorionic gonadotropin, and thyroid-stimulating hormone. All of these glycoproteins consist of an identical alpha subunit and a hormone-specific beta subunit. This gene encodes the beta subunit of follicle-stimulating hormone. In conjunction with luteinizing hormone, follicle-stimulating hormone induces egg and sperm production. Alternative splicing results in two transcript variants encoding the same protein.
