

GNLY Antibody (N-term) Blocking peptide
Synthetic peptide
Catalog # BP13075a**Specification**

GNLY Antibody (N-term) Blocking peptide - Product InformationPrimary Accession [P22749](#)**GNLY Antibody (N-term) Blocking peptide - Additional Information****Gene ID** 10578**Other Names**

Granulysin, Lymphokine LAG-2, Protein NKG5, T-cell activation protein 519, GNLY, LAG2, NKG5, TLA519

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

GNLY Antibody (N-term) Blocking peptide - Protein Information**Name** GNLY**Synonyms** LAG2, NKG5, TLA519**Function**

Antimicrobial protein that kills intracellular pathogens. Active against a broad range of microbes, including Gram-positive and Gram-negative bacteria, fungi, and parasites. Kills Mycobacterium tuberculosis.

Cellular Location

Secreted. Note=Located in the cytotoxic granules of T-cells, which are released upon antigen stimulation

Tissue Location

Expressed in natural killer and T-cells.

GNLY Antibody (N-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

GNLY Antibody (N-term) Blocking peptide - Background

The product of this gene is a member of the saposin-like protein (SAPLIP) family and is located in the cytotoxic granules of T cells, which are released upon antigen stimulation. This protein is present in cytotoxic granules of cytotoxic T lymphocytes and natural killer cells, and it has antimicrobial activity against *M. tuberculosis* and other organisms. Alternatively spliced transcript variants encoding different isoforms have been identified.
