

Bik BH3 Domain Antibody Blocking Peptide
Synthetic peptide
Catalog # BP1319a**Specification**

Bik BH3 Domain Antibody Blocking Peptide - Product InformationPrimary Accession [Q13323](#)**Bik BH3 Domain Antibody Blocking Peptide - Additional Information****Gene ID** 638**Other Names**

Bcl-2-interacting killer, Apoptosis inducer NBK, BIP1, BP4, BIK, NBK

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP1319a was selected from the region of human Bik BH3 Domain. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

Bik BH3 Domain Antibody Blocking Peptide - Protein Information**Name** BIK**Synonyms** NBK**Function**

Accelerates programmed cell death. Association to the apoptosis repressors Bcl-X(L), BHRF1, Bcl-2 or its adenovirus homolog E1B 19k protein suppresses this death-promoting activity. Does not interact with BAX.

Cellular Location

Endomembrane system; Single-pass membrane protein. Mitochondrion membrane; Single-pass membrane protein. Note=Around the nuclear envelope, and in cytoplasmic membranes

Bik BH3 Domain Antibody Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

Bik BH3 Domain Antibody Blocking Peptide - Background

The Bik protein is known to interact with cellular and viral survival-promoting proteins, such as BCL2 and the Epstein-Barr virus in order to enhance programmed cell death. Because its activity is suppressed in the presence of survival-promoting proteins, this protein is suggested as a likely target for antiapoptotic proteins. This protein shares a critical BH3 domain with other death-promoting proteins, BAX and BAK.
