

NRK Antibody (Center) Blocking peptide
Synthetic peptide
Catalog # BP13448c**Specification**

NRK Antibody (Center) Blocking peptide - Product InformationPrimary Accession [Q7Z2Y5](#)**NRK Antibody (Center) Blocking peptide - Additional Information****Gene ID** 203447**Other Names**

Nik-related protein kinase, NRK

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP13448c was selected from the Center region of NRK. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

NRK Antibody (Center) Blocking peptide - Protein Information**Name** NRK**Function**

May phosphorylate cofilin-1 and induce actin polymerization through this process, during the late stages of embryogenesis. Involved in the TNF-alpha-induced signaling pathway (By similarity).

NRK Antibody (Center) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Blocking Peptides](#)

NRK Antibody (Center) Blocking peptide - Images**NRK Antibody (Center) Blocking peptide - Background**

The mouse ortholog of this gene encodes a protein kinase required for JNK activation. The encoded protein may be involved in the induction of actin polymerization in late embryogenesis.
