

**HSPA12B Antibody (N-term) Blocking peptide**  
**Synthetic peptide**  
**Catalog # BP13579a****Specification**

---

**HSPA12B Antibody (N-term) Blocking peptide - Product Information**Primary Accession [Q96MM6](#)**HSPA12B Antibody (N-term) Blocking peptide - Additional Information****Gene ID** 116835**Other Names**

Heat shock 70 kDa protein 12B, HSPA12B, C20orf60

**Target/Specificity**

The synthetic peptide sequence used to generate the antibody AP13579a was selected from the N-term region of HSPA12B. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**HSPA12B Antibody (N-term) Blocking peptide - Protein Information****Name** HSPA12B**Synonyms** C20orf60**Tissue Location**

Highest expression in muscle and heart. Lower levels in liver and kidney.

**HSPA12B Antibody (N-term) Blocking peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

**HSPA12B Antibody (N-term) Blocking peptide - Background**

The protein encoded by this gene contains an atypical heatshock protein 70 (Hsp70) ATPase domain and is therefore a distant member of the mammalian Hsp70 family. This gene may be involved in susceptibility to atherosclerosis. Alternative splicing results in multiple transcript variants.
