

PPP2CB Antibody (C-term) Blocking peptide
Synthetic peptide
Catalog # BP13765b**Specification**

PPP2CB Antibody (C-term) Blocking peptide - Product InformationPrimary Accession [P62714](#)**PPP2CB Antibody (C-term) Blocking peptide - Additional Information****Gene ID** 5516**Other Names**

Serine/threonine-protein phosphatase 2A catalytic subunit beta isoform, PP2A-beta, PPP2CB

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP13765b was selected from the C-term region of PPP2CB. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

PPP2CB Antibody (C-term) Blocking peptide - Protein Information**Name** PPP2CB ([HGNC:9300](#))**Function**

Catalytic subunit of protein phosphatase 2A (PP2A), a serine/threonine phosphatase involved in the regulation of a wide variety of enzymes, signal transduction pathways, and cellular events (Probable). PP2A can modulate the activity of phosphorylase B kinase, casein kinase 2, mitogen-stimulated S6 kinase, and MAP-2 kinase.

Cellular Location

Cytoplasm. Nucleus. Chromosome, centromere. Cytoplasm, cytoskeleton, spindle pole. Note=In prometaphase cells, but not in anaphase cells, localizes at centromeres. During mitosis, also found at spindle poles

PPP2CB Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.
