

TMTC4 Antibody (N-term) Blocking peptide
Synthetic peptide
Catalog # BP13825a**Specification**

TMTC4 Antibody (N-term) Blocking peptide - Product InformationPrimary Accession [Q5T4D3](#)**TMTC4 Antibody (N-term) Blocking peptide - Additional Information****Gene ID** 84899**Other Names**

Transmembrane and TPR repeat-containing protein 4, TMTC4

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP13825a was selected from the N-term region of TMTC4. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

TMTC4 Antibody (N-term) Blocking peptide - Protein Information**Name** TMTC4 ([HGNC:25904](#))**Function**

Transfers mannosyl residues to the hydroxyl group of serine or threonine residues. The 4 members of the TMTC family are O-mannosyl- transferases dedicated primarily to the cadherin superfamily, each member seems to have a distinct role in decorating the cadherin domains with O-linked mannose glycans at specific regions. Also acts as O- mannosyl-transferase on other proteins such as PDIA3.

Cellular Location

Membrane; Multi-pass membrane protein. Endoplasmic reticulum

TMTC4 Antibody (N-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.
