

AP3M2 Antibody (N-term) Blocking peptide
Synthetic peptide
Catalog # BP13888a**Specification**

AP3M2 Antibody (N-term) Blocking peptide - Product InformationPrimary Accession [P53677](#)**AP3M2 Antibody (N-term) Blocking peptide - Additional Information****Gene ID** 10947**Other Names**

AP-3 complex subunit mu-2, Adaptor-related protein complex 3 subunit mu-2, Clathrin assembly protein assembly protein complex 3 mu-2 medium chain, Clathrin coat assembly protein AP47 homolog 2, Clathrin coat-associated protein AP47 homolog 2, Golgi adaptor AP-1 47 kDa protein homolog 2, HA1 47 kDa subunit homolog 2, Mu3B-adaptin, P47B, AP3M2

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP13888a was selected from the N-term region of AP3M2. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

AP3M2 Antibody (N-term) Blocking peptide - Protein Information**Name** AP3M2**Function**

Part of the AP-3 complex, an adaptor-related complex which is not clathrin-associated. The complex is associated with the Golgi region as well as more peripheral structures. It facilitates the budding of vesicles from the Golgi membrane and may be directly involved in trafficking to lysosomes. In concert with the BLOC-1 complex, AP-3 is required to target cargos into vesicles assembled at cell bodies for delivery into neurites and nerve terminals.

Cellular Location

Golgi apparatus. Cytoplasmic vesicle membrane; Peripheral membrane protein; Cytoplasmic side. Note=Component of the coat surrounding the cytoplasmic face of coated vesicles located at the Golgi complex

AP3M2 Antibody (N-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

AP3M2 Antibody (N-term) Blocking peptide - Images**AP3M2 Antibody (N-term) Blocking peptide - Background**

This gene encodes a subunit of the heterotetrameric adaptor-related protein complex 3 (AP-3), which belongs to the adaptor complexes medium subunits family. The AP-3 complex plays a role in protein trafficking to lysosomes and specialized organelles. Multiple alternatively spliced variants, encoding the same protein, have been identified.
