

LYPL1 Antibody (Center) Blocking peptide
Synthetic peptide
Catalog # BP13955c**Specification**

LYPL1 Antibody (Center) Blocking peptide - Product InformationPrimary Accession [Q5VWZ2](#)**LYPL1 Antibody (Center) Blocking peptide - Additional Information****Gene ID** 127018**Other Names**

Lysophospholipase-like protein 1, 312-, LYPLAL1

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP13955c was selected from the Center region of LYPL1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

LYPL1 Antibody (Center) Blocking peptide - Protein Information**Name** LYPLAL1 {ECO:0000303|PubMed:37802025, ECO:0000312|HGNC:HGNC:20440}**Function**

Palmitoyl thioesterase that catalyzes depalmitoylation of CGAS and KCNMA1 (PubMed:22052940, PubMed:22399288, PubMed:37802025). Acts as a regulator of innate immunity by mediating depalmitoylation of CGAS, thereby preventing CGAS homodimerization and cyclic GMP-AMP synthase activity (PubMed:37802025). Does not exhibit phospholipase nor triacylglycerol lipase activity, able to hydrolyze only short chain substrates due to its shallow active site (PubMed:22052940).

Cellular Location

[Isoform 1]: Cytoplasm, cytosol

LYPL1 Antibody (Center) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.
