

**IBSP Antibody (N-term) Blocking peptide**  
**Synthetic peptide**  
**Catalog # BP14114a****Specification**

---

**IBSP Antibody (N-term) Blocking peptide - Product Information**Primary Accession [P21815](#)**IBSP Antibody (N-term) Blocking peptide - Additional Information****Gene ID** 3381**Other Names**

Bone sialoprotein 2, Bone sialoprotein II, BSP II, Cell-binding sialoprotein, Integrin-binding sialoprotein, IBSP, BNSP

**Target/Specificity**

The synthetic peptide sequence used to generate the antibody AP14114a was selected from the N-term region of IBSP. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**IBSP Antibody (N-term) Blocking peptide - Protein Information****Name** IBSP**Synonyms** BNSP**Function**

Binds tightly to hydroxyapatite (PubMed: [11459848](http://www.uniprot.org/citations/11459848)). Appears to form an integral part of the mineralized matrix (PubMed: [1818768](http://www.uniprot.org/citations/1818768)). Probably important to cell-matrix interaction (PubMed: [1818768](http://www.uniprot.org/citations/1818768)). Promotes adhesion and migration of various cells via the alpha-V/beta-3 integrin receptor (ITGAV:ITGB3) (PubMed: [10640428](http://www.uniprot.org/citations/10640428), PubMed: [11459848](http://www.uniprot.org/citations/11459848), PubMed: [24103036](http://www.uniprot.org/citations/24103036)).

**Cellular Location**  
Secreted.**Tissue Location**

Expressed in bone (at protein level) (PubMed:11459848). Expressed in trophoblast cells of placenta (at protein level) (PubMed:1818768). Expressed in brain (PubMed:36261010)

**IBSP Antibody (N-term) Blocking peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

**IBSP Antibody (N-term) Blocking peptide - Images****IBSP Antibody (N-term) Blocking peptide - Background**

The protein encoded by this gene is a major structural protein of the bone matrix. It constitutes approximately 12% of the noncollagenous proteins in human bone and is synthesized by skeletal-associated cell types, including hypertrophic chondrocytes, osteoblasts, osteocytes, and osteoclasts. The only extraskeletal site of its synthesis is the trophoblast. This protein binds to calcium and hydroxyapatite via its acidic amino acid clusters, and mediates cell attachment through an RGD sequence that recognizes the vitronectin receptor.
