

UBP46 Antibody (C-term) Blocking peptide
Synthetic peptide
Catalog # BP14161b**Specification**

UBP46 Antibody (C-term) Blocking peptide - Product InformationPrimary Accession [P62068](#)**UBP46 Antibody (C-term) Blocking peptide - Additional Information****Gene ID** 64854**Other Names**

Ubiquitin carboxyl-terminal hydrolase 46, Deubiquitinating enzyme 46, Ubiquitin thioesterase 46, Ubiquitin-specific-processing protease 46, USP46

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP14161b was selected from the C-term region of UBP46. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

UBP46 Antibody (C-term) Blocking peptide - Protein Information**Name** USP46**Function**

Deubiquitinating enzyme that plays a role in behavior, possibly by regulating GABA action. May act by mediating the deubiquitination of GAD1/GAD67 (By similarity). Has almost no deubiquitinating activity by itself and requires the interaction with WDR48 to have a high activity (PubMed:19075014, PubMed:26388029). Not involved in deubiquitination of monoubiquitinated FANCD2 (PubMed:19075014).

Cellular Location

Cytoplasm. Note=USP46/WDR48/WDR20 complex is predominantly cytoplasmic

Tissue Location

Broadly expressed..

UBP46 Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

UBP46 Antibody (C-term) Blocking peptide - Background

Modification of cellular proteins by ubiquitin is an essential regulatory mechanism controlled by the coordinated action of multiple ubiquitin-conjugating and deubiquitinating enzymes. USP46 belongs to a large family of cysteine proteases that function as deubiquitinating enzymes (Quesada et al., 2004 [PubMed14715245]).
