

FIP200 Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP14323c**Specification**

FIP200 Antibody (Center) Blocking Peptide - Product Information

Primary Accession [Q8TDY2](#)
Other Accession [Q86YR4](#)

FIP200 Antibody (Center) Blocking Peptide - Additional Information

Gene ID 9821

Other Names

RB1-inducible coiled-coil protein 1, FAK family kinase-interacting protein of 200 kDa, FIP200, RB1CC1, KIAA0203, RBICC

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

FIP200 Antibody (Center) Blocking Peptide - Protein Information

Name RB1CC1 ([HGNC:15574](#))

Synonyms KIAA0203, RBICC

Function

Involved in autophagy (PubMed: [21775823](http://www.uniprot.org/citations/21775823)). Regulates early events but also late events of autophagosome formation through direct interaction with Atg16L1 (PubMed: [23392225](http://www.uniprot.org/citations/23392225)). Required for the formation of the autophagosome-like double-membrane structure that surrounds the Salmonella-containing vacuole (SCV) during S.typhimurium infection and subsequent xenophagy (By similarity). Involved in repair of DNA damage caused by ionizing radiation, which subsequently improves cell survival by decreasing apoptosis (By similarity). Inhibits PTK2/FAK1 and PTK2B/PYK2 kinase activity, affecting their downstream signaling pathways (PubMed: [10769033](http://www.uniprot.org/citations/10769033), PubMed: [12221124](http://www.uniprot.org/citations/12221124)). Plays a role as a modulator of TGF-beta-signaling by restricting substrate specificity of RNF111 (By similarity). Functions as a DNA-binding transcription factor (PubMed: [12095676](http://www.uniprot.org/citations/12095676)). Is a potent

regulator of the RB1 pathway through induction of RB1 expression (PubMed:14533007). Plays a crucial role in muscular differentiation (PubMed:12163359). Plays an indispensable role in fetal hematopoiesis and in the regulation of neuronal homeostasis (By similarity).

Cellular Location

Nucleus. Cytoplasm. Cytoplasm, cytosol {ECO:0000250|UniProtKB:Q9ESK9}. Preautophagosomal structure. Lysosome Note=Under starvation conditions, is localized to punctate structures primarily representing the isolation membrane that sequesters a portion of the cytoplasm resulting in the formation of an autophagosome

Tissue Location

Expression levels correlated closely with those of RB1 in cancer cell lines as well as in various normal human tissues Abundantly expressed in human musculoskeletal and cultured osteosarcoma cells.

FIP200 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.
