

DSG2 Antibody (C-term) Blocking Peptide

Synthetic peptide Catalog # BP14404b

Specification

DSG2 Antibody (C-term) Blocking Peptide - Product Information

Primary Accession

<u>014126</u>

DSG2 Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 1829

Other Names

Desmoglein-2, Cadherin family member 5, HDGC, DSG2, CDHF5

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

DSG2 Antibody (C-term) Blocking Peptide - Protein Information

Name DSG2

Synonyms CDHF5

Function

Component of intercellular desmosome junctions. Involved in the interaction of plaque proteins and intermediate filaments mediating cell-cell adhesion.

Cellular Location

Cell membrane; Single-pass type I membrane protein. Cell junction, desmosome

Tissue Location

All of the tissues tested and carcinomas.

DSG2 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

• Blocking Peptides

DSG2 Antibody (C-term) Blocking Peptide - Background

Desmosomes are cell-cell junctions between epithelial, myocardial, and certain other cell types. This gene product is acalcium-binding transmembrane glycoprotein component of desmosomesin vertebrate epithelial cells. Currently, three desmogleinsubfamily members have been identified and all are members of thecadherin cell adhesion molecule superfamily. These desmoglein genefamily members are located in a cluster on chromosome 18. Thissecond family member is expressed in colon, colon carcinoma, andother simple and stratified epithelial-derived cell lines. Mutations in this gene have been associated with arrhythmogenicright ventricular dysplasia, familial, 10.
