

IRX3 Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP14549a**Specification**

IRX3 Antibody (N-term) Blocking Peptide - Product InformationPrimary Accession [P78415](#)**IRX3 Antibody (N-term) Blocking Peptide - Additional Information****Gene ID** 79191**Other Names**

Iroquois-class homeodomain protein IRX-3, Homeodomain protein IRXB1, Iroquois homeobox protein 3, IRX3, IRXB1

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

IRX3 Antibody (N-term) Blocking Peptide - Protein Information**Name** IRX3**Synonyms** IRXB1**Function**

Transcription factor involved in SHH-dependent neural patterning. Together with NKX2-2 and NKX6-1 acts to restrict the generation of motor neurons to the appropriate region of the neural tube. Belongs to the class I proteins of neuronal progenitor factors, which are repressed by SHH signals. Involved in the transcriptional repression of MNX1 in non-motor neuron cells. Acts as a regulator of energy metabolism.

Cellular Location

Nucleus.

IRX3 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

IRX3 Antibody (N-term) Blocking Peptide - Background

IRX3 is a member of the Iroquois homeobox gene family (see IRX1; MIM 606197) and plays a role in an early step of neural development (Bellefroid et al., 1998 [PubMed 9427753]). Members of this family appear to play multiple roles during pattern formation of vertebrate embryos (Lewis et al., 1999 [PubMed 10370142]).
