

SIRT3 Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP14573a**Specification**

SIRT3 Antibody (N-term) Blocking Peptide - Product InformationPrimary Accession [O9NTG7](#)**SIRT3 Antibody (N-term) Blocking Peptide - Additional Information**

Gene ID 23410

Other Names

NAD-dependent protein deacetylase sirtuin-3, mitochondrial, hSIRT3, 351-, Regulatory protein SIR2 homolog 3, SIR2-like protein 3, SIRT3, SIR2L3

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

SIRT3 Antibody (N-term) Blocking Peptide - Protein Information

Name SIRT3

Synonyms SIR2L3

Function

NAD-dependent protein deacetylase (PubMed: [12186850](http://www.uniprot.org/citations/12186850), PubMed: [12374852](http://www.uniprot.org/citations/12374852), PubMed: [16788062](http://www.uniprot.org/citations/16788062), PubMed: [18680753](http://www.uniprot.org/citations/18680753), PubMed: [18794531](http://www.uniprot.org/citations/18794531), PubMed: [23283301](http://www.uniprot.org/citations/23283301), PubMed: [24121500](http://www.uniprot.org/citations/24121500), PubMed: [24252090](http://www.uniprot.org/citations/24252090), PubMed: [19535340](http://www.uniprot.org/citations/19535340)). Activates or deactivates mitochondrial target proteins by deacetylating key lysine residues (PubMed: [12186850](http://www.uniprot.org/citations/12186850), PubMed: [12374852](http://www.uniprot.org/citations/12374852), PubMed: [16788062](http://www.uniprot.org/citations/16788062), PubMed: [18680753](http://www.uniprot.org/citations/18680753), PubMed: [12186850](http://www.uniprot.org/citations/12186850), PubMed: [12374852](http://www.uniprot.org/citations/12374852), PubMed: [16788062](http://www.uniprot.org/citations/16788062), PubMed:

<http://www.uniprot.org/citations/18794531> target="_blank">18794531, PubMed:23283301, PubMed:24121500, PubMed:24252090). Known targets include ACSS1, IDH, GDH, SOD2, PDHA1, LCAD, SDHA and the ATP synthase subunit ATP5PO (PubMed:16788062, PubMed:18680753, PubMed:24121500, PubMed:24252090, PubMed:19535340). Contributes to the regulation of the cellular energy metabolism (PubMed:24252090). Important for regulating tissue-specific ATP levels (PubMed:18794531). In response to metabolic stress, deacetylates transcription factor FOXO3 and recruits FOXO3 and mitochondrial RNA polymerase POLRMT to mtDNA to promote mtDNA transcription (PubMed:23283301). Acts as a regulator of ceramide metabolism by mediating deacetylation of ceramide synthases CERS1, CERS2 and CERS6, thereby increasing their activity and promoting mitochondrial ceramide accumulation (By similarity). Regulates hepatic lipogenesis. Uses NAD(+) substrate imported by SLC25A47, triggering downstream activation of PRKAA1/AMPK-alpha signaling cascade that ultimately downregulates sterol regulatory element-binding protein (SREBP) transcriptional activities and ATP-consuming lipogenesis to restore cellular energy balance.

Cellular Location

Mitochondrion matrix

Tissue Location

Widely expressed.

SIRT3 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

SIRT3 Antibody (N-term) Blocking Peptide - Background

This gene encodes a member of the sirtuin family of proteins, homologs to the yeast Sir2 protein. Members of the sirtuin family are characterized by a sirtuin core domain and grouped into four classes. The functions of human sirtuins have not yet been determined; however, yeast sirtuin proteins are known to regulate epigenetic gene silencing and suppress recombination of rDNA. Studies suggest that the human sirtuins may function as intracellular regulatory proteins with mono-ADP-ribosyltransferase activity. The protein encoded by this gene is included in class I of the sirtuin family. Two alternatively spliced transcript variants that encode different proteins have been described for this gene.
