

PAX7 Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP14692c

Specification

PAX7 Antibody (Center) Blocking Peptide - Product Information

Primary Accession [P23759](#)

PAX7 Antibody (Center) Blocking Peptide - Additional Information

Gene ID 5081

Other Names

Paired box protein Pax-7, HuP1, PAX7, HUP1

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

PAX7 Antibody (Center) Blocking Peptide - Protein Information

Name PAX7

Synonyms HUP1

Function

Transcription factor that is involved in the regulation of muscle stem cells proliferation, playing a role in myogenesis and muscle regeneration.

Cellular Location

Nucleus {ECO:0000250|UniProtKB:P47239}.

PAX7 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

PAX7 Antibody (Center) Blocking Peptide - Background

This gene is a member of the paired box (PAX) family of transcription factors. Members of this gene family typically contain a paired box domain, an octapeptide, and a paired-type homeo domain. These genes play critical roles during fetal development and cancer growth. The specific function of the paired box 7 gene is unknown but speculated to involve tumor suppression since fusion of this gene with a forkhead domain family member has been associated with alveolar rhabdomyosarcoma. Three transcript variants encoding different isoforms have been found for this gene.
