

PRPF6 Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP16097b**Specification**

PRPF6 Antibody (C-term) Blocking Peptide - Product InformationPrimary Accession [O94906](#)**PRPF6 Antibody (C-term) Blocking Peptide - Additional Information****Gene ID** 24148**Other Names**

Pre-mRNA-processing factor 6, Androgen receptor N-terminal domain-transactivating protein 1, ANT-1, PRP6 homolog, U5 snRNP-associated 102 kDa protein, U5-102 kDa protein, PRPF6, C20orf14

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

PRPF6 Antibody (C-term) Blocking Peptide - Protein Information**Name** PRPF6**Synonyms** C20orf14**Function**

Involved in pre-mRNA splicing as component of the U4/U6-U5 tri-snRNP complex, one of the building blocks of the spliceosome (PubMed:28781166, PubMed:21549338). Enhances dihydrotestosterone- induced transactivation activity of AR, as well as dexamethasone- induced transactivation activity of NR3C1, but does not affect estrogen-induced transactivation.

Cellular Location

Nucleus, nucleoplasm. Nucleus speckle. Note=Localized in splicing speckles.

Tissue Location

Widely expressed..

PRPF6 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

PRPF6 Antibody (C-term) Blocking Peptide - Background

PRPF6 is involved in pre-mRNA splicing. May act in the tri-snRNP complex as a bridging factor between U5 and U4/U6 snRNPs in the late step of spliceosome assembly. May be necessary for tri-snRNP formation.
