

KIDINS220 Antibody (C-term) Blocking Peptide

Synthetic peptide Catalog # BP16256b

Specification

KIDINS220 Antibody (C-term) Blocking Peptide - Product Information

Primary Accession

Q9ULH0

KIDINS220 Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 57498

Other Names

Kinase D-interacting substrate of 220 kDa, Ankyrin repeat-rich membrane-spanning protein, KIDINS220, ARMS, KIAA1250

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

KIDINS220 Antibody (C-term) Blocking Peptide - Protein Information

Name KIDINS220

Synonyms ARMS, KIAA1250

Function

Promotes a prolonged MAP-kinase signaling by neurotrophins through activation of a Rap1-dependent mechanism. Provides a docking site for the CRKL-C3G complex, resulting in Rap1-dependent sustained ERK activation. May play an important role in regulating postsynaptic signal transduction through the syntrophin-mediated localization of receptor tyrosine kinases such as EPHA4. In cooperation with SNTA1 can enhance EPHA4-induced JAK/STAT activation. Plays a role in nerve growth factor (NGF)-induced recruitment of RAPGEF2 to late endosomes and neurite outgrowth. May play a role in neurotrophin- and ephrin-mediated neuronal outgrowth and in axon guidance during neural development and in neuronal regeneration (By similarity). Modulates stress-induced apoptosis of melanoma cells via regulation of the MEK/ERK signaling pathway.

Cellular Location

Membrane; Multi-pass membrane protein. Late endosome. Note=Localized at late endosome before or after nerve growth factor (NGF) stimulation

Tissue Location

Tel: 858.875.1900 Fax: 858.875.1999

Abundant in developing and adult neural tissues as well as neuroendocrine cells and dendritic cells. Overexpressed in melanoma and melanoma cell lines.

KIDINS220 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.
