

ATRN Antibody (C-term) Blocking Peptide Synthetic peptide

Catalog # BP16370b

Specification

ATRN Antibody (C-term) Blocking Peptide - Product Information

Primary Accession

<u>075882</u>

ATRN Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 8455

Other Names Attractin, DPPT-L, Mahogany homolog, ATRN, KIAA0548, MGCA

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions This product is for research use only. Not for use in diagnostic or therapeutic procedures.

ATRN Antibody (C-term) Blocking Peptide - Protein Information

Name ATRN

Synonyms KIAA0548, MGCA

Function

Involved in the initial immune cell clustering during inflammatory response and may regulate chemotactic activity of chemokines. May play a role in melanocortin signaling pathways that regulate energy homeostasis and hair color. Low-affinity receptor for agouti (By similarity). Has a critical role in normal myelination in the central nervous system (By similarity).

Cellular Location

[Isoform 1]: Cell membrane; Single-pass type I membrane protein [Isoform 3]: Secreted

Tissue Location

Isoform 2 is detected in plasma (at protein level). Expressed and secreted by activated T-lymphocytes. Expressed at low to moderate levels in peripheral blood leukocytes, spleen, lymph node, tonsil, bone marrow and fetal liver. At very low levels found in thymus. Isoform 2 is the major isoform in peripheral blood leukocytes

ATRN Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

ATRN Antibody (C-term) Blocking Peptide - Background

Multiple transcript variants encoding different isoformsexist for this gene. One of the isoforms is a membrane-boundprotein with sequence similarity to the mouse mahogany protein, areceptor involved in controlling obesity. The other isoform is asecreted protein involved in the initial immune cell clusteringduring inflammatory responses that may regulate the chemotacticactivity of chemokines.
