

RPAIN Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP16641a**Specification**

RPAIN Antibody (N-term) Blocking Peptide - Product Information

Primary Accession [Q86UA6](#)

RPAIN Antibody (N-term) Blocking Peptide - Additional Information

Gene ID 84268

Other Names

RPA-interacting protein, hRIP, RPAIN, RIP

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

RPAIN Antibody (N-term) Blocking Peptide - Protein Information

Name RPAIN

Synonyms RIP

Function

Mediates the import of RPA complex into the nucleus, possibly via some interaction with importin beta. Isoform 2 is sumoylated and mediates the localization of RPA complex into the PML body of the nucleus, thereby participating in RPA function in DNA metabolism.

Cellular Location

[Isoform 1]: Cytoplasm. Nucleus.

Tissue Location

Widely expressed. Expressed in pancreas, kidney, muscle, liver, lung, placenta, brain, heart, leukocytes, colon, intestine, ovary, testis, prostate, thymus and spleen

RPAIN Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.
