

RCN1 Antibody (C-term) Blocking Peptide Synthetic peptide Catalog # BP16754b

Specification

RCN1 Antibody (C-term) Blocking Peptide - Product Information

Primary Accession

<u>Q15293</u>

RCN1 Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 5954

Other Names Reticulocalbin-1, RCN1, RCN

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions This product is for research use only. Not for use in diagnostic or therapeutic procedures.

RCN1 Antibody (C-term) Blocking Peptide - Protein Information

Name RCN1

Synonyms RCN

Function May regulate calcium-dependent activities in the endoplasmic reticulum lumen or post-ER compartment.

Cellular Location Endoplasmic reticulum lumen.

RCN1 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

RCN1 Antibody (C-term) Blocking Peptide - Background

Reticulocalbin 1 is a calcium-binding protein located inthe lumen of the ER. The protein contains six conserved regionswith similarity to a high affinity Ca(+2)-binding motif, theEF-hand. High conservation of amino acid residues outside of thesemotifs, in comparison to mouse reticulocalbin, is consistent with apossible biochemical function besides that of calcium binding. Inhuman endothelial and prostate cancer cell lines this proteinlocalizes to the plasma membrane.
