

PIGL Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP16850a

Specification

PIGL Antibody (N-term) Blocking Peptide - Product Information

Primary Accession [Q9Y2B2](#)

PIGL Antibody (N-term) Blocking Peptide - Additional Information

Gene ID 9487

Other Names

N-acetylglucosaminyl-phosphatidylinositol de-N-acetylase, Phosphatidylinositol-glycan biosynthesis class L protein, PIG-L, PIGL

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

PIGL Antibody (N-term) Blocking Peptide - Protein Information

Name PIGL ([HGNC:8966](#))

Function

Catalyzes the second step of glycosylphosphatidylinositol (GPI) biosynthesis, which is the de-N-acetylation of N- acetylglucosaminyl-phosphatidylinositol.

Cellular Location

Endoplasmic reticulum membrane; Single-pass type I membrane protein

PIGL Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

PIGL Antibody (N-term) Blocking Peptide - Background

This gene encodes an enzyme that catalyzes the second step of glycosylphosphatidylinositol (GPI) biosynthesis, which is the de-N-acetylation of N-acetylglucosaminylphosphatidylinositol (GlcNAc-PI). Study of a similar rat enzyme suggests that this protein localizes to the endoplasmic reticulum. [provided by RefSeq].
