

ABCF2 Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP16883a**Specification**

ABCF2 Antibody (N-term) Blocking Peptide - Product InformationPrimary Accession [Q9UG63](#)**ABCF2 Antibody (N-term) Blocking Peptide - Additional Information****Gene ID** 10061**Other Names**

ATP-binding cassette sub-family F member 2, Iron-inhibited ABC transporter 2, ABCF2

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

ABCF2 Antibody (N-term) Blocking Peptide - Protein Information**Name** ABCF2**ABCF2 Antibody (N-term) Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

ABCF2 Antibody (N-term) Blocking Peptide - Images**ABCF2 Antibody (N-term) Blocking Peptide - Background**

The protein encoded by this gene is a member of the superfamily of ATP-binding cassette (ABC) transporters. ABC proteins transport various molecules across extra- and intracellular membranes. ABC genes are divided into seven distinct subfamilies (ABC1, MDR/TAP, MRP, ALD, OABP, GCN20, and White). This protein is a member of the GCN20 subfamily. Alternative splicing of this gene results in multiple transcript variants. [provided by RefSeq].
