

P2RX6 Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP17114c

Specification

P2RX6 Antibody (Center) Blocking Peptide - Product Information

Primary Accession [O15547](#)

P2RX6 Antibody (Center) Blocking Peptide - Additional Information

Gene ID 9127

Other Names

P2X purinoceptor 6, P2X6, ATP receptor, P2XM, Purinergic receptor, Purinergic receptor P2X-like 1, P2RX6, P2RXL1, P2X6

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

P2RX6 Antibody (Center) Blocking Peptide - Protein Information

Name P2RX6

Synonyms P2RXL1, P2X6

Function

Receptor for ATP that acts as a ligand-gated ion channel.

Cellular Location

Membrane; Multi-pass membrane protein.

Tissue Location

Expressed predominantly in skeletal muscle.

P2RX6 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

P2RX6 Antibody (Center) Blocking Peptide - Images**P2RX6 Antibody (Center) Blocking Peptide - Background**

The protein encoded by this gene belongs to the family of P2X receptors, which are ATP-gated ion channels and mediate rapid and selective permeability to cations. This gene is predominantly expressed in skeletal muscle, and regulated by p53. The encoded protein is associated with VE-cadherin at the adherens junctions of human umbilical vein endothelial cells. Alternative splicing results in multiple transcript variants. A related pseudogene, which is also located on chromosome 22, has been identified.
