

FBXL13 Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP17121b**Specification**

FBXL13 Antibody (C-term) Blocking Peptide - Product InformationPrimary Accession [Q8NEE6](#)**FBXL13 Antibody (C-term) Blocking Peptide - Additional Information****Gene ID** 222235**Other Names**

F-box/LRR-repeat protein 13, F-box and leucine-rich repeat protein 13, FBXL13, FBL13

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

FBXL13 Antibody (C-term) Blocking Peptide - Protein Information**Name** FBXL13**Synonyms** DRC6 {ECO:0000250|UniProtKB:Q8CDU4}, FBL**Function**

Substrate-recognition component of the SCF (SKP1-CUL1-F-box protein)-type E3 ubiquitin ligase complex. Component of the nexin- dynein regulatory complex (N-DRC), a key regulator of ciliary/flagellar motility which maintains the alignment and integrity of the distal axoneme and regulates microtubule sliding in motile axonemes. Specifically targets CEP192 isoform 3 for ubiquitin-mediated proteolysis and thereby acts as a regulator of microtubule nucleation activity (PubMed:29348145).

Cellular Location

Cytoplasm, cytoskeleton, flagellum axoneme {ECO:0000250|UniProtKB:A8JHD7}. Cytoplasm, cytoskeleton, microtubule organizing center, centrosome

FBXL13 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

FBXL13 Antibody (C-term) Blocking Peptide - Background

Members of the F-box protein family, such as FBXL13, are characterized by an approximately 40-amino acid F-box motif. SCF complexes, formed by SKP1 (MIM 601434), cullin (see CUL1; MIM603134), and F-box proteins, act as protein-ubiquitin ligases. F-box proteins interact with SKP1 through the F box, and they interact with ubiquitination targets through other protein interaction domains (Jin et al., 2004 [PubMed 15520277]). [supplied by OMIM].
