

SALL1 Antibody (N-term) Blocking Peptide

Synthetic peptide Catalog # BP17204a

Specification

SALL1 Antibody (N-term) Blocking Peptide - Product Information

Primary Accession

Q9NSC2

SALL1 Antibody (N-term) Blocking Peptide - Additional Information

Gene ID 6299

Other Names

Sal-like protein 1, Spalt-like transcription factor 1, Zinc finger protein 794, Zinc finger protein SALL1, Zinc finger protein Spalt-1, HSal1, Sal-1, SALL1, ZNF794

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

SALL1 Antibody (N-term) Blocking Peptide - Protein Information

Name SALL1

Synonyms SAL1, ZNF794

Function

Transcriptional repressor involved in organogenesis. Plays an essential role in ureteric bud invasion during kidney development.

Cellular Location

Nucleus {ECO:0000250|UniProtKB:Q9ER74}.

Tissue Location

Highest levels in kidney. Lower levels in adult brain (enriched in corpus callosum, lower expression in substantia nigra) and liver

SALL1 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

• Blocking Peptides

SALL1 Antibody (N-term) Blocking Peptide - Background

The protein encoded by this gene is a zinc fingertranscriptional repressor and may be part of the NuRD histonedeacetylase complex (HDAC). Defects in this gene are a cause ofTownes-Brocks syndrome (TBS) as well as bronchio-oto-renal syndrome(BOR). Two transcript variants encoding different isoforms have been found for this gene.
