

SLC12A2 Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP17792b**Specification**

SLC12A2 Antibody (C-term) Blocking Peptide - Product InformationPrimary Accession [P55011](#)**SLC12A2 Antibody (C-term) Blocking Peptide - Additional Information****Gene ID** 6558**Other Names**

Solute carrier family 12 member 2, Basolateral Na-K-Cl symporter, Bumetanide-sensitive sodium-(potassium)-chloride cotransporter 1, SLC12A2, NKCC1

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

SLC12A2 Antibody (C-term) Blocking Peptide - Protein Information**Name** SLC12A2**Function**

Cation-chloride cotransporter which mediates the electroneutral transport of chloride, potassium and/or sodium ions across the membrane (PubMed:32081947, PubMed:33597714, PubMed:32294086, PubMed:7629105, PubMed:16669787). Plays a vital role in the regulation of ionic balance and cell volume (PubMed:32081947, PubMed:32294086, PubMed:7629105, PubMed:16669787).

Cellular Location

Basolateral cell membrane; Multi-pass membrane protein

Tissue Location

Expressed in many tissues.

SLC12A2 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

SLC12A2 Antibody (C-term) Blocking Peptide - Background

By moving chloride into epithelial cells, the Na-K-Clcotransporter SLC12A2 aids transcellular movement of chloride across both secretory and absorptive epithelia (Payne et al., 1995[PubMed 7629105]). See also SLC12A1 (MIM 600839) and SLC12A3 (MIM600968).
