

PVRL4 Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP17922c

Specification

PVRL4 Antibody (Center) Blocking Peptide - Product Information

Primary Accession [Q96NY8](#)

PVRL4 Antibody (Center) Blocking Peptide - Additional Information

Gene ID 81607

Other Names

Nectin-4, Ig superfamily receptor LNIR, Poliovirus receptor-related protein 4, Processed poliovirus receptor-related protein 4, PVRL4, LNIR, PRR4

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

PVRL4 Antibody (Center) Blocking Peptide - Protein Information

Name NECTIN4 ([HGNC:19688](#))

Synonyms LNIR, PRR4, PVRL4

Function

Seems to be involved in cell adhesion through trans- homophilic and -heterophilic interactions, the latter including specifically interactions with NECTIN1. Does not act as receptor for alpha-herpesvirus entry into cells.

Cellular Location

Cell membrane; Single-pass type I membrane protein. Cell junction, adherens junction.
Note=Colocalizes with AFDN at cadherin- based adherens junctions (PubMed:11544254)

Tissue Location

Predominantly expressed in placenta. Not detected in normal breast epithelium but expressed in breast carcinoma

PVRL4 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

PVRL4 Antibody (Center) Blocking Peptide - Background

Poliovirus receptor-like proteins (PVRLs), such as PVRL4, are adhesion receptors of the immunoglobulin superfamily and function in cell-cell adhesion (Reymond et al., 2001 [PubMed11544254]).
