

**ACCS Antibody (Center) Blocking Peptide**  
**Synthetic peptide**  
**Catalog # BP17952c****Specification**

---

**ACCS Antibody (Center) Blocking Peptide - Product Information**

Primary Accession [Q96QU6](#)

**ACCS Antibody (Center) Blocking Peptide - Additional Information**

**Gene ID** 84680

**Other Names**

1-aminocyclopropane-1-carboxylate synthase-like protein 1, ACC synthase-like protein 1, ACCS, PHACS

**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**ACCS Antibody (Center) Blocking Peptide - Protein Information**

**Name** ACCS

**Synonyms** PHACS

**Function**

Does not catalyze the synthesis of 1-aminocyclopropane-1-carboxylate but is capable of catalyzing the deamination of L-vinylglycine.

**ACCS Antibody (Center) Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Blocking Peptides](#)

**ACCS Antibody (Center) Blocking Peptide - Images****ACCS Antibody (Center) Blocking Peptide - Background**

ACCS does not catalyze the synthesis of 1-aminocyclopropane-1-carboxylate but is capable of

catalyzing the deamination of L-vinylglycine.
