

ADAT1 Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP17954a**Specification**

ADAT1 Antibody (N-term) Blocking Peptide - Product Information

Primary Accession [Q9BUB4](#)

ADAT1 Antibody (N-term) Blocking Peptide - Additional Information

Gene ID 23536

Other Names

tRNA-specific adenosine deaminase 1, hADAT1, tRNA-specific adenosine-37 deaminase, ADAT1

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

ADAT1 Antibody (N-term) Blocking Peptide - Protein Information

Name ADAT1

Function

Specifically deaminates adenosine-37 to inosine in tRNA-Ala.

Tissue Location

Ubiquitously expressed.

ADAT1 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

ADAT1 Antibody (N-term) Blocking Peptide - Images**ADAT1 Antibody (N-term) Blocking Peptide - Background**

This gene is a member of the ADAR (adenosine deaminase acting on RNA) family. Using site-specific adenosine modification, proteins encoded by these genes participate in the pre-mRNA editing of

nuclear transcripts. The protein encoded by this gene, tRNA-specific adenosine deaminase 1, is responsible for the deamination of adenosine 37 to inosine in eukaryotic tRNA. Alternatively spliced transcript variants have been described.
