

FCRL1 Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP18448b**Specification**

FCRL1 Antibody (C-term) Blocking Peptide - Product InformationPrimary Accession [Q96LA6](#)**FCRL1 Antibody (C-term) Blocking Peptide - Additional Information****Gene ID** 115350**Other Names**

Fc receptor-like protein 1, FcR-like protein 1, FCRL1, Fc receptor homolog 1, FcRH1, IFGP family protein 1, hIFGP1, Immune receptor translocation-associated protein 5, CD307a, FCRL1, FCRH1, IFGP1, IRTA5

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

FCRL1 Antibody (C-term) Blocking Peptide - Protein Information**Name** FCRL1**Synonyms** FCRH1, IFGP1, IRTA5**Function**

May function as an activating coreceptor in B-cells. May function in B-cells activation and differentiation.

Cellular Location

Cell membrane; Single-pass type I membrane protein

Tissue Location

Primarily expressed in secondary lymphoid tissues by mature subsets of B-cells. Detected in spleen, lymph node, heart, skeletal muscle, kidney, liver and placenta. Specifically expressed by mature B lineage cells with higher expression in naive versus memory B- cells (at protein level).

FCRL1 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

FCRL1 Antibody (C-term) Blocking Peptide - Background

This gene encodes a member of the immunoglobulin receptorsuperfamily and is one of several Fc receptor-like glycoproteinsclustered on the long arm of chromosome 1. The encoded proteincontains three extracellular C2-like immunoglobulin domains, atransmembrane domain and a cytoplasmic domain with twoimmunoreceptor-tyrosine activation motifs. This protein may play arole in the regulation of cancer cell growth. Alternative splicingresults in multiple transcript variants.
