

FLOT1 Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP18905a**Specification**

FLOT1 Antibody (N-term) Blocking Peptide - Product InformationPrimary Accession [O75955](#)**FLOT1 Antibody (N-term) Blocking Peptide - Additional Information****Gene ID** 10211**Other Names**
Flotillin-1, FLOT1**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

FLOT1 Antibody (N-term) Blocking Peptide - Protein Information**Name** FLOT1**Function**

May act as a scaffolding protein within caveolar membranes, functionally participating in formation of caveolae or caveolae-like vesicles.

Cellular Location

Cell membrane; Peripheral membrane protein. Endosome Membrane, caveola {ECO:0000250|UniProtKB:O08917}; Peripheral membrane protein {ECO:0000250|UniProtKB:O08917}. Melanosome. Membrane raft. Note=Identified by mass spectrometry in melanosome fractions from stage I to stage IV (PubMed:17081065) Membrane-associated protein of caveola (By similarity) {ECO:0000250|UniProtKB:O08917, ECO:0000269|PubMed:17081065}

FLOT1 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

FLOT1 Antibody (N-term) Blocking Peptide - Images**FLOT1 Antibody (N-term) Blocking Peptide - Background**

Caveolae are small domains on the inner cell membrane involved in vesicular trafficking and signal transduction. FLOT1 encodes a caveolae-associated, integral membrane protein. The function of flotillin 1 has not been determined. [provided by RefSeq].
