

SURF6 Antibody (Center) Blocking Peptide Synthetic peptide

Catalog # BP19078c

Specification

SURF6 Antibody (Center) Blocking Peptide - Product Information

Primary Accession

<u>075683</u>

SURF6 Antibody (Center) Blocking Peptide - Additional Information

Gene ID 6838

Other Names Surfeit locus protein 6, SURF6, SURF-6

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions This product is for research use only. Not for use in diagnostic or therapeutic procedures.

SURF6 Antibody (Center) Blocking Peptide - Protein Information

Name SURF6

Synonyms SURF-6

Function Binds to both DNA and RNA in vitro, with a stronger binding capacity for RNA. May represent a nucleolar constitutive protein involved in ribosomal biosynthesis or assembly (By similarity).

Cellular Location Nucleus, nucleoplasm. Nucleus, nucleolus. Note=Granular component of the nucleolus

SURF6 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

SURF6 Antibody (Center) Blocking Peptide - Background

This gene is located in the surfeit gene cluster, a groupof very tightly linked genes that do not share sequence similarity. The gene demonstrates features of a housekeeping gene, beingubiquitously expressed, and the encoded protein has been localized to the nucleolus. The protein includes motifs found in both themouse and fish orthologs, which suggests a putative function as anucleolar-matrix protein with nucleic acid-binding properties, based on characteristics determined in mouse.
