

TBCB Antibody (N-term) Blocking Peptide Synthetic peptide Catalog # BP19083a

Specification

TBCB Antibody (N-term) Blocking Peptide - Product Information

Primary Accession

<u>Q99426</u>

TBCB Antibody (N-term) Blocking Peptide - Additional Information

Gene ID 1155

Other Names

Tubulin-folding cofactor B, Cytoskeleton-associated protein 1, Cytoskeleton-associated protein CKAPI, Tubulin-specific chaperone B, TBCB, CG22, CKAP1

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions This product is for research use only. Not for use in diagnostic or therapeutic procedures.

TBCB Antibody (N-term) Blocking Peptide - Protein Information

Name TBCB

Synonyms CG22, CKAP1

Function

Binds to alpha-tubulin folding intermediates after their interaction with cytosolic chaperonin in the pathway leading from newly synthesized tubulin to properly folded heterodimer (PubMed:9265649). Involved in regulation of tubulin heterodimer dissociation. May function as a negative regulator of axonal growth (By similarity).

Cellular Location

Cytoplasm. Cytoplasm, cytoskeleton. Note=Colocalizes with microtubules. In differentiated neurons, located in the cytoplasm. In differentiating neurons, accumulates at the growth cone.

Tissue Location Found in most tissues.

TBCB Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.
