

**FLJ20433 Antibody (N-term) (Putative DNA Repair Protein) Blocking peptide**  
**Synthetic peptide**  
**Catalog # BP1911b****Specification**

---

**FLJ20433 Antibody (N-term) (Putative DNA Repair Protein) Blocking peptide - Product Information**

Primary Accession [O9NX53](#)  
Other Accession [Q8IXT8](#)

**FLJ20433 Antibody (N-term) (Putative DNA Repair Protein) Blocking peptide - Additional Information****Other Names**

Exonuclease mut-7 homolog, isoform 5, EXD3

**Target/Specificity**

The synthetic peptide sequence used to generate the antibody [AP1911b](/product/products/AP1911b) was selected from the N-term region of human FLJ20433. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**FLJ20433 Antibody (N-term) (Putative DNA Repair Protein) Blocking peptide - Protein Information****FLJ20433 Antibody (N-term) (Putative DNA Repair Protein) Blocking peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

**FLJ20433 Antibody (N-term) (Putative DNA Repair Protein) Blocking peptide - Images****FLJ20433 Antibody (N-term) (Putative DNA Repair Protein) Blocking peptide - Background**

FLJ20433 is a putative DNA repair protein involved in regulation of nucleobase, nucleoside, nucleotide and nucleic acid metabolism. It may have a specific role in the RNAi pathway.
