

XK Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP19173a**Specification**

XK Antibody (N-term) Blocking Peptide - Product Information

Primary Accession [P51811](#)

XK Antibody (N-term) Blocking Peptide - Additional Information

Gene ID 7504

Other Names

Membrane transport protein XK, Kell complex 37 kDa component, Kx antigen, XK-related protein 1, XK, XKR1, XRG1

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

XK Antibody (N-term) Blocking Peptide - Protein Information

Name XK {ECO:0000303|PubMed:8004674, ECO:0000312|HGNC:HGNC:12811}

Function

Recruits the lipid transfer protein VPS13A from lipid droplets to the endoplasmic reticulum (ER) membrane.

Cellular Location

Endoplasmic reticulum membrane; Multi-pass membrane protein

Tissue Location

High levels in skeletal muscle, heart, brain, and pancreas; low levels in placenta, lung, liver, and kidney

XK Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

XK Antibody (N-term) Blocking Peptide - Images**XK Antibody (N-term) Blocking Peptide - Background**

This locus controls the synthesis of the Kell blood group precursor substance' (Kx). Mutations in this gene have been associated with McLeod syndrome, an X-linked, recessive disorder characterized by abnormalities in the neuromuscular and hematopoietic systems. The encoded protein has structural characteristics of prokaryotic and eukaryotic membrane transport proteins.
