

Mouse Shb Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP19244b**Specification**

Mouse Shb Antibody (C-term) Blocking Peptide - Product InformationPrimary Accession [Q6PD21](#)**Mouse Shb Antibody (C-term) Blocking Peptide - Additional Information****Gene ID** 230126**Other Names**

SH2 domain-containing adapter protein B, Shb

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

Mouse Shb Antibody (C-term) Blocking Peptide - Protein Information**Name** Shb**Function**

Adapter protein which regulates several signal transduction cascades by linking activated receptors to downstream signaling components. May play a role in angiogenesis by regulating FGFR1, VEGFR2 and PDGFR signaling. May also play a role in T-cell antigen receptor/TCR signaling, interleukin-2 signaling, apoptosis and neuronal cells differentiation by mediating basic-FGF and NGF-induced signaling cascades. May also regulate IRS1 and IRS2 signaling in insulin- producing cells (By similarity).

Cellular Location

Cytoplasm. Cell membrane; Peripheral membrane protein; Cytoplasmic side. Note=Associates with membrane lipid rafts upon TCR stimulation.

Tissue Location

Expressed in heart, liver, brain and kidney (at protein level).

Mouse Shb Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.
