

MFAP1 Antibody (N-term) Blocking Peptide

Synthetic peptide Catalog # BP1928b

Specification

MFAP1 Antibody (N-term) Blocking Peptide - Product Information

Primary Accession

P55081

MFAP1 Antibody (N-term) Blocking Peptide - Additional Information

Gene ID 4236

Other Names

Microfibrillar-associated protein 1, MFAP1

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP1928b was selected from the N-term region of human MFAP1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

MFAP1 Antibody (N-term) Blocking Peptide - Protein Information

Name MFAP1 (HGNC:7032)

Function

Involved in pre-mRNA splicing as a component of the spliceosome.

Cellular Location

Nucleus.

MFAP1 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

• Blocking Peptides

MFAP1 Antibody (N-term) Blocking Peptide - Background

MFAP1 is a component of the elastin-associated microfibrils. Microfibrils, found either in association with elastin or independently, are an important component of the extracellular matrix of many tissues. MFAP1 is one of a number of proteins demonstrated to be essential for cell division.
