

Mouse Gpi Antibody(C-term) Blocking peptide
Synthetic peptide
Catalog # BP19643b**Specification**

Mouse Gpi Antibody(C-term) Blocking peptide - Product InformationPrimary Accession [P06745](#)**Mouse Gpi Antibody(C-term) Blocking peptide - Additional Information****Gene ID** 14751**Other Names**

Glucose-6-phosphate isomerase, GPI, Autocrine motility factor, AMF, Neuroleukin, NLK, Phosphoglucose isomerase, PGI, Phosphohexose isomerase, PHI, Gpi, Gpi1

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

Mouse Gpi Antibody(C-term) Blocking peptide - Protein Information**Name** Gpi {ECO:0000303|PubMed:7545951}**Function**

In the cytoplasm, catalyzes the conversion of glucose-6-phosphate to fructose-6-phosphate, the second step in glycolysis, and the reverse reaction during gluconeogenesis (PubMed:2344351, PubMed:7277315, PubMed:8417789). Besides its role as a glycolytic enzyme, also acts as a secreted cytokine: acts as an angiogenic factor (AMF) that stimulates endothelial cell motility (By similarity). Acts as a neurotrophic factor, neuroleukin, for spinal and sensory neurons (PubMed:3352745, PubMed:3764429). It is secreted by lectin-stimulated T-cells and induces immunoglobulin secretion (PubMed:3352745).

Cellular Location

Cytoplasm {ECO:0000250|UniProtKB:P06744}. Secreted {ECO:0000250|UniProtKB:P06744}

Mouse Gpi Antibody(C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

Mouse Gpi Antibody(C-term) Blocking peptide - Background

Besides its role as a glycolytic enzyme, mammalian GPI can function as a tumor-secreted cytokine and an angiogenic factor (AMF) that stimulates endothelial cell motility. GPI is also a neurotrophic factor (Neuroleukin) for spinal and sensory neurons.
