

ADPRH Blocking Peptide (C-term)

Synthetic peptide

Catalog # BP20001b

Specification

ADPRH Blocking Peptide (C-term) - Product Information

Primary Accession

[P54922](#)

Other Accession

[Q32KR8](#), [NP_001116.1](#)**ADPRH Blocking Peptide (C-term) - Additional Information****Gene ID** 141**Other Names**

[Protein ADP-ribosylarginine] hydrolase, ADP-ribosylarginine hydrolase, ADP-ribose-L-arginine cleaving enzyme, ADPRH, ARH1

Target/Specificity

The synthetic peptide sequence is selected from aa 321-334 of HUMAN ADPRH

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

ADPRH Blocking Peptide (C-term) - Protein Information**Name** ADPRH**Synonyms** ARH1**Function**

Specifically acts as an arginine mono-ADP-ribosylhydrolase by mediating the removal of mono-ADP-ribose attached to arginine residues on proteins.

ADPRH Blocking Peptide (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

ADPRH Blocking Peptide (C-term) - Background

The enzyme encoded by this gene catalyzes removal of mono-ADP-ribose from arginine residues of proteins in the ADP-ribosylation cycle. Unlike the rat and mouse enzymes, which require DTT for maximal activity, the human enzyme is DTT-independent.
