

## LYVE1 (XLKD1) Antibody (C-term) Blocking peptide

Synthetic peptide Catalog # BP2015b

## **Specification**

## LYVE1 (XLKD1) Antibody (C-term) Blocking peptide - Product Information

Primary Accession Q9Y5Y7
Other Accession NP\_006682

# LYVE1 (XLKD1) Antibody (C-term) Blocking peptide - Additional Information

### Gene ID 10894

#### **Other Names**

Lymphatic vessel endothelial hyaluronic acid receptor 1, LYVE-1, Cell surface retention sequence-binding protein 1, CRSBP-1, Extracellular link domain-containing protein 1, Hyaluronic acid receptor, LYVE1, CRSBP1, HAR, XLKD1

## Target/Specificity

The synthetic peptide sequence used to generate the antibody <a href=/product/products/AP2015b>AP2015b</a> was selected from the C-term region of human XLKD1 . A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

## **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

## Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

# LYVE1 (XLKD1) Antibody (C-term) Blocking peptide - Protein Information

# Name LYVE1

Synonyms CRSBP1, HAR, XLKD1

#### **Function**

Ligand-specific transporter trafficking between intracellular organelles (TGN) and the plasma membrane. Plays a role in autocrine regulation of cell growth mediated by growth regulators containing cell surface retention sequence binding (CRS). May act as a hyaluronan (HA) transporter, either mediating its uptake for catabolism within lymphatic endothelial cells themselves, or its transport into the lumen of afferent lymphatic vessels for subsequent re-uptake and degradation in lymph nodes (PubMed:<a href="http://www.uniprot.org/citations/10037799" target="\_blank">10037799</a>). Binds to pericelluar hyaluronan matrices deposited on the

surface of leukocytes and facilitates cell adhesion and migration through lymphatic endothelium (PubMed:<a href="http://www.uniprot.org/citations/26823460" target="blank">26823460</a>).

#### **Cellular Location**

Cell membrane; Single-pass type I membrane protein. Note=Localized to the plasma membrane and in vesicles near extranuclear membranes which may represent trans- Golgi network (TGN) and endosomes/prelysosomeal compartments. Undergoes ligand-dependent internalization and recycling at the cell surface Localizes at cell-cell junctions

#### **Tissue Location**

Mainly expressed in endothelial cells lining lymphatic vessels.

# LYVE1 (XLKD1) Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

### Blocking Peptides

LYVE1 (XLKD1) Antibody (C-term) Blocking peptide - Images

## LYVE1 (XLKD1) Antibody (C-term) Blocking peptide - Background

XLKD1 is a type I integral membrane glycoprotein. The encoded protein acts as a receptor and binds to both soluble and immobilized hyaluronan. This protein may function in lymphatic hyaluronan transport and have a role in tumor metastasis.
