

DBP Blocking Peptide (C-term) Synthetic peptide Catalog # BP21269b

### **Specification**

# **DBP Blocking Peptide (C-term) - Product Information**

Primary Accession

<u>Q10586</u>

## **DBP Blocking Peptide (C-term) - Additional Information**

Gene ID 1628

**Other Names** 

D site-binding protein, Albumin D box-binding protein, Albumin D-element-binding protein, Tax-responsive enhancer element-binding protein 302, TaxREB302, DBP

Target/Specificity

The synthetic peptide sequence is selected from aa 233-246 of HUMAN DBP

#### Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage** Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions** This product is for research use only. Not for use in diagnostic or therapeutic procedures.

# **DBP Blocking Peptide (C-term) - Protein Information**

Name DBP

Function

This transcriptional activator recognizes and binds to the sequence 5'-RTTAYGTAAY-3' found in the promoter of genes such as albumin, CYP2A4 and CYP2A5. It is not essential for circadian rhythm generation, but modulates important clock output genes. May be a direct target for regulation by the circadian pacemaker component clock. May affect circadian period and sleep regulation.

Cellular Location Nucleus.

**Tissue Location** 

Ubiquitously expressed. Expressed in the suprachiasmatic nuclei (SCN) and in most peripheral tissues, with a strong circadian rhythmicity

# DBP Blocking Peptide (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.
