

**PORCN Blocking Peptide (Center)**

Synthetic peptide

Catalog # BP21406c

**Specification**

---

**PORCN Blocking Peptide (Center) - Product Information**Primary Accession [Q9H237](#)**PORCN Blocking Peptide (Center) - Additional Information**

Gene ID 64840

**Other Names**

Protein-cysteine N-palmitoyltransferase porcupine, 231-, Protein MG61, PORCN, MG61, PORC, PPN

**Target/Specificity**

The synthetic peptide sequence is selected from aa 138-151 of HUMAN PORCN

**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**PORCN Blocking Peptide (Center) - Protein Information**Name PORCN ([HGNC:17652](#))**Function**

Protein-serine O-palmitoleyltransferase that acts as a key regulator of the Wnt signaling pathway by mediating the attachment of palmitoleate, a 16-carbon monounsaturated fatty acid (C16:1(9Z)), to Wnt proteins. Serine palmitoleoylation of WNT proteins is required for efficient binding to frizzled receptors.

**Cellular Location**

Endoplasmic reticulum membrane {ECO:0000250|UniProtKB:Q9JJJ7}; Multi-pass membrane protein {ECO:0000250|UniProtKB:Q9JJJ7}

**Tissue Location**

Isoform 1 is expressed in fetal brain, brain, amygdala, caudate nucleus, cerebellum, hippocampus, pituitary, thalamus, heart, skeletal muscle and testis. Isoform 4 is expressed in amygdala, corpus callosum, hippocampus, spinal cord, kidney, liver, lung, spleen, uterus, testis. Isoform 2 and isoform 3 are expressed in substantia nigra, spinal cord, heart and lung

## **PORCN Blocking Peptide (Center) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

## **PORCN Blocking Peptide (Center) - Images**

## **PORCN Blocking Peptide (Center) - Background**

protein-cysteine N-palmitoyltransferase that modulates the processing of Wnt proteins by mediating serine palmitoylation of Wnt family members.
