

LMX1A Blocking Peptide (C-term)

Synthetic peptide

Catalog # BP21429b

Specification

LMX1A Blocking Peptide (C-term) - Product Information

Primary Accession

[Q8TE12](#)**LMX1A Blocking Peptide (C-term) - Additional Information**

Gene ID 4009

Other Names

LIM homeobox transcription factor 1-alpha, LIM/homeobox protein 11, LMX-11, LIM/homeobox protein LMX1A, LMX1A

Target/Specificity

The synthetic peptide sequence is selected from aa 303-317 of HUMAN LMX1A

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

LMX1A Blocking Peptide (C-term) - Protein Information

Name LMX1A

Function

Acts as a transcriptional activator by binding to an A/T-rich sequence, the FLAT element, in the insulin gene promoter. Required for development of the roof plate and, in turn, for specification of dorsal cell fates in the CNS and developing vertebrae (By similarity).

Cellular Location

Nucleus {ECO:0000255|PROSITE-ProRule:PRU00108}.

Tissue Location

Isoform 1 is expressed in many tissues. Not found in heart, liver, spleen and testis. Relatively highly expressed in fetal brain. Isoform LMX1A-4AB is expressed in testis

LMX1A Blocking Peptide (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.
