

CAPN2 Blocking Peptide (N-Term) Synthetic peptide Catalog # BP21462a

## Specification

# **CAPN2 Blocking Peptide (N-Term) - Product Information**

**Primary Accession** 

<u>P17655</u>

# **CAPN2 Blocking Peptide (N-Term) - Additional Information**

Gene ID 824

**Other Names** 

Calpain-2 catalytic subunit, Calcium-activated neutral proteinase 2, CANP 2, Calpain M-type, Calpain large polypeptide L2, Calpain-2 large subunit, Millimolar-calpain, M-calpain, CAPN2, CANPL2

## **Target/Specificity** The synthetic peptide sequence is selected from aa 10-23 of HUMAN CAPN2

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions** 

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

# **CAPN2 Blocking Peptide (N-Term) - Protein Information**

Name CAPN2

Synonyms CANPL2

Function

Calcium-regulated non-lysosomal thiol-protease which catalyzes limited proteolysis of substrates involved in cytoskeletal remodeling and signal transduction. Proteolytically cleaves MYOC at 'Arg-226' (PubMed:<a href="http://www.uniprot.org/citations/17650508" target="\_blank">17650508</a>). Proteolytically cleaves CPEB3 following neuronal stimulation which abolishes CPEB3 translational repressor activity, leading to translation of CPEB3 target mRNAs (By similarity).

**Cellular Location** Cytoplasm. Cell membrane. Note=Translocates to the plasma membrane upon Ca(2+) binding

**Tissue Location** 

Ubiquitous.

# CAPN2 Blocking Peptide (N-Term) - Protocols

Provided below are standard protocols that you may find useful for product applications.
