

KIF22 Blocking Peptide (Center)
Synthetic peptide
Catalog # BP21475c**Specification**

KIF22 Blocking Peptide (Center) - Product InformationPrimary Accession [Q14807](#)**KIF22 Blocking Peptide (Center) - Additional Information****Gene ID** 3835**Other Names**

Kinesin-like protein KIF22, Kinesin-like DNA-binding protein, Kinesin-like protein 4, KIF22, KID, KNSL4

Target/Specificity

The synthetic peptide sequence is selected from aa 423-436 of HUMAN KIF22

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

KIF22 Blocking Peptide (Center) - Protein Information**Name** KIF22**Synonyms** KID, KNSL4**Function**

Kinesin family member that is involved in spindle formation and the movements of chromosomes during mitosis and meiosis. Binds to microtubules and to DNA (By similarity). Plays a role in congression of laterally attached chromosomes in NDC80-depleted cells (PubMed:25743205).

Cellular Location

Nucleus. Cytoplasm, cytoskeleton

Tissue Location

Expressed in bone, cartilage, joint capsule, ligament, skin, and primary cultured chondrocytes

KIF22 Blocking Peptide (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.
