

CALY Blocking Peptide (C-term)
Synthetic peptide
Catalog # BP21631b

Specification

CALY Blocking Peptide (C-term) - Product Information

Primary Accession [Q9NYX4](#)

CALY Blocking Peptide (C-term) - Additional Information

Gene ID 50632

Other Names

Neuron-specific vesicular protein calcyon, CALY, DRD1IP

Target/Specificity

The synthetic peptide sequence is selected from aa 154-167 of HUMAN CALY

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

CALY Blocking Peptide (C-term) - Protein Information

Name CALY

Synonyms DRD1IP

Function

Interacts with clathrin light chain A and stimulates clathrin self-assembly and clathrin-mediated endocytosis.

Cellular Location

Cytoplasmic vesicle membrane; Single-pass membrane protein. Cell membrane; Single-pass membrane protein

Tissue Location

Expressed in the pyramidal cells of the prefrontal cortex, in hypothalamus and in caudate nucleus. No expression in spleen. Up-regulated in the prefrontal cortex of schizophrenic patients with nearly twice the levels of non-schizophrenics

CALY Blocking Peptide (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.
