

SDHC Blocking Peptide (C-Term)
Synthetic peptide
Catalog # BP21871b**Specification**

SDHC Blocking Peptide (C-Term) - Product InformationPrimary Accession [Q99643](#)**SDHC Blocking Peptide (C-Term) - Additional Information**

Gene ID 6391

Other Names

Succinate dehydrogenase cytochrome b560 subunit, mitochondrial, Integral membrane protein CII-3, QPs-1, QPs1, Succinate dehydrogenase complex subunit C, Succinate-ubiquinone oxidoreductase cytochrome B large subunit, CYBL, SDHC, CYB560, SDH3

Target/Specificity

The synthetic peptide sequence is selected from aa 133-144 of HUMAN SDHC

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

SDHC Blocking Peptide (C-Term) - Protein Information

Name SDHC

Synonyms CYB560, SDH3

Function

Membrane-anchoring subunit of succinate dehydrogenase (SDH) that is involved in complex II of the mitochondrial electron transport chain and is responsible for transferring electrons from succinate to ubiquinone (coenzyme Q) (PubMed:9533030). SDH also oxidizes malate to the non-canonical enol form of oxaloacetate, enol-oxaloacetate (By similarity). Enol-oxaloacetate, which is a potent inhibitor of the succinate dehydrogenase activity, is further isomerized into keto- oxaloacetate (By similarity).

Cellular Location

Mitochondrion inner membrane; Multi-pass membrane protein

SDHC Blocking Peptide (C-Term) - Protocols

Provided below are standard protocols that you may find useful for product applications.
