

GPR124 Blocking Peptide (C-Term)

Synthetic peptide

Catalog # BP21894b

Specification

GPR124 Blocking Peptide (C-Term) - Product Information

Primary Accession

[Q96PE1](#)**GPR124 Blocking Peptide (C-Term) - Additional Information**

Gene ID 25960

Other Names

G-protein coupled receptor 124, Tumor endothelial marker 5, GPR124, KIAA1531, TEM5

Target/Specificity

The synthetic peptide sequence is selected from aa 1279-1293 of HUMAN GPR124

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

GPR124 Blocking Peptide (C-Term) - Protein InformationName ADGRA2 ([HGNC:17849](#))**Function**

Endothelial receptor which functions together with RECK to enable brain endothelial cells to selectively respond to Wnt7 signals (WNT7A or WNT7B) (PubMed:28289266, PubMed:30026314). Plays a key role in Wnt7-specific responses, such as endothelial cell sprouting and migration in the forebrain and neural tube, and establishment of the blood-brain barrier (By similarity). Acts as a Wnt7-specific coactivator of canonical Wnt signaling: required to deliver RECK-bound Wnt7 to frizzled by assembling a higher-order RECK-ADGRA2-Fzd-LRP5-LRP6 complex (PubMed:30026314). ADGRA2-tethering function does not rely on its G-protein coupled receptor (GPCR) structure but instead on its combined capacity to interact with RECK extracellularly and recruit the Dishevelled scaffolding protein intracellularly (PubMed:30026314). Binds to the glycosaminoglycans heparin, heparin sulfate, chondroitin sulfate and dermatan sulfate (PubMed:16982628).

Cellular Location

Cell membrane; Multi-pass membrane protein. Cell projection, filopodium. Note=Enriched at lateral cell borders and also at sites of cell-ECM (extracellular matrix) contact

Tissue Location

Expressed in endothelial cells (at protein level) (PubMed:15021905, PubMed:16982628).
Abundantly expressed in heart, placenta, ovary, small intestine, and colon (PubMed:15021905)

GPR124 Blocking Peptide (C-Term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Blocking Peptides](#)

GPR124 Blocking Peptide (C-Term) - Images**GPR124 Blocking Peptide (C-Term) - Background**

Endothelial receptor that acts as an essential regulator of CNS angiogenesis. Required for normal endothelial cell sprouting and migration in the forebrain and neural tube (By similarity).
